Notable Projects

The Tiffin Wala

Using MERN

- Developed and deployed a full-stack Tiffin Service application using Node.js, Express, and MongoDB for the backend, and React and Redux
- Implemented secure authentication with JWT, integrated payment processing with Razorpay, and utilized cloud storage with Cloudinary.
- Enhanced user experience with real-time notifications via Email, form validation, and responsive design using Tailwind CSS and Material UI.

Cash Flow Minimiser

Using Javascript

- Developed a Cashflow Minimizer Tool: Created a custom cashflow minimizer using JavaScript, leveraging a max-heap data structure implemented from scratch to optimize financial transactions and resource allocation.

DreamHomes

Using MERN

- Developed and optimized a real estate platform using the MERN stack, featuring secure authentication (JWT, Firebase, Google OAuth), advanced search, and CRUD operations for property management.
- Implemented image upload and filtering functionalities, enhancing user experience and enabling efficient property discovery management.
